Common Worksheet Topics and Their Answers

In educational worksheets, students are often tested on both the structure and function of the abdominal cavity. Below are typical questions with detailed answers.

- Describe the main boundaries of the abdominal cavity.

Answer: The abdominal cavity is bounded superiorly by the diaphragm, inferiorly by the pelvic brim, laterally by the abdominal muscles (rectus abdominis, external and internal obliques, transversus abdominis), and posteriorly by the vertebral column and associated musculature.

- List the major organs contained within the abdominal cavity.

Answer: The major organs include the stomach, small intestine (duodenum, jejunum, ileum), large intestine (cecum, colon, rectum), liver, gallbladder, pancreas, spleen, kidneys, and associated blood vessels and lymphatics.

- Explain the role of the peritoneum and mesenteries.

Answer: The peritoneum is a serous membrane lining the abdominal cavity, providing a frictionless surface for organ movement and supporting organs via mesenteries?double layers of peritoneum that contain blood vessels, lymphatics, and nerves supplying the organs. These structures also allow the passage of essential vessels and nerves.
