Core Contents of the Stock Fitter's Bible Second Edition

- Understanding Stock Anatomy

A thorough understanding of stock components is essential before making modifications:

- Fore-end: Supports the barrel and bipod attachments.
- Pistol grip: Affects handling and control.
- Cheek rest: Critical for eye alignment with sights or scopes.
- Buttstock: Provides shoulder contact and absorbs recoil.
- Lateral and vertical adjustments: For fine-tuning fit.

- Measuring and Assessing Your Current Fit

Before making changes, precise measurements are crucial:

- Eye-to-sight alignment: Ensures proper scope or iron sight positioning.
- Cheek weld: How comfortably the shooter can rest their cheek on the stock.
- Pull length: Distance from the trigger to the butt plate.
- Drop at comb: Vertical distance between the cheek rest and the stock's bottom.
- Heel height: To maintain proper eye alignment and recoil management.

Tools for measurement include:

- Calipers
- Rulers
- Custom fitting gauges
- Digital measurement devices

- Planning Your Stock Modifications

Based on your assessments, develop a plan:

- Identify areas needing adjustment.
- Decide whether modifications are additive (adding material) or subtractive (removing material).
- Consider stock material limitations and compatibility.

Techniques in Stock Fitting (Step-by-Step)

a. Achieving Proper Length of Pull

Adjusting Length of Pull (LOP):

- Adding spacers: Use rubber or foam spacers inside the buttstock.
- Replacing or modifying the buttplate: Install adjustable or thicker pads.
- Cutting or extending the stock: For significant adjustments, professional woodworking or synthetic stock modifications may be necessary.

Tips:

- Test fit with the shooter in a comfortable shooting stance.
- Aim for a trigger finger position where the finger naturally contacts the trigger without stretching.

b. Adjusting Drop and Comb Height

Methods to modify drop at comb:

- Adding shims: Insert thin layers of material beneath the cheek rest.
- Carving or sanding: Carefully reshape the comb for a custom fit.
- Adding adjustable cheek pieces: Many aftermarket stocks or aftermarket parts offer adjustable cheek rests.

Note: Always remove small amounts of material gradually to avoid over-adjustment.

c. Recontouring and Refinishing

For complex adjustments:

- Use hand files, rasps, or power tools for shaping.
- Sand the surface smoothly after carving.

- Refinish the stock with matching stain or paint to restore aesthetic appeal.

d. Dealing with Synthetic and Composite Stocks

Synthetic stocks often allow for easier modifications:

- Some models permit internal modifications or adding inserts.
- Use of specialized epoxies or inserts can help achieve desired dimensions.
- Always follow manufacturer guidelines to avoid damage.

Advanced Fitting Techniques

- Bedding the Action

A crucial step for precision shooting:

- Purpose: Ensures the action fits snugly within the stock, eliminating movement.
- Method: Apply bedding compound or epoxy between the action and stock.
- Steps:
 - Remove the action from the stock.
 - Clean and degrease surfaces.
 - Apply bedding material to contact areas.
 - Reinstall the action and let the compound cure.
 - Carefully relieve excess material for smooth operation.

- Installing Adjustable Components

- Adjustable cheek rests: For quick modifications on the fly.
- Adjustable recoil pads: To fine-tune length of pull and recoil absorption.
- Lateral and vertical adjustments: For optimal alignment.

Troubleshooting Common Fitting Issues

| Issue | Possible Cause | Solution |

|-----|-----|-----|

| Stock feels too tight or loose | Improper measurements or material deformation | Re-assess measurements; consider bedding or reinforcement |

| Poor eye alignment | Incorrect cheek height | Adjust or replace cheek rest; add shims |

| Excessive recoil | Incorrect buttpad placement or stock length | Adjust length of pull; add recoil pads |

| Stock cracks or splits | Material stress or improper modifications | Reinforce with epoxy; replace if necessary |

Maintenance and Upkeep

- Regularly inspect stock for cracks, wear, or loosened fittings.
- Clean synthetic stocks with mild soap and water.
- Refinish wooden stocks periodically to preserve appearance and integrity.
- Store stocks in a climate-controlled environment to prevent warping or deterioration.
